

## Optical data coupler LS684-DA-EN-9003/F1

- Independent of Ethernet protocol
- TCP/IP, PROFINET, PROFIsafe, EtherCAT, FSoE, EtherNet/IP™, Ethernet POWERLINK etc.
- No parameterization
- Line indicator for signal strength

Optical data coupler for fast Ethernet, 150 m detection range, infrared light, 100 Mbit/s data rate, M12 plug

### Function

The optical data coupler connects Ethernet modules to remote modules. These can move toward each other along an axis. The devices are ideal for conditions in high-rack storage. The physical transfer takes place protocol-free with 100 MBit/s full duplex. The device offers robust optical data transfer in real time for industrial Ethernet networks such as PROFINET IRT and EtherCAT. The optical data coupler guarantees a consistent turnaround time for synchronous, jitter-free switching operations and control processes at both ends of the transmission range – over any distance and with any driving dynamics.

Connection Assignment

Release date: 2023-07-24 Date of issue: 2023-07-24 Filename: 70150475\_eng.pdf

## Assembly

## Indication

## Installation

### Function Indicator/Operating Reserve

A red alignment LED, which can be seen from a long way off, is located on the front of the device to serve as an alignment aid. As soon as a receiver detects the emitted light of the device opposite it, the flashing frequency of the alignment aid decreases. If the light goes out, this indicates that the devices are aligned with sufficient operating reserve. For fine adjustment, the optical data coupler features a bar graph display (signal display) for optimum alignment.

### Mounting

The device is mounted using appropriate accessories, e.g., OMH-LS610-01 for wall mounting. The x-y adjuster is delivered preassembled. It is fixed in the required beam direction ( $\pm 90^\circ$  rotation possible) on the mounting bracket.

## Characteristic Curve

Safety Information

Safety Information

- Laser Class 1M Information**
- The irradiation can lead to irritation especially in a dark environment. Do not point at people!
  - Caution: laser light, do not observe laser light with optical instruments such as magnifying glasses, microscopes, telescopes or binoculars.
  - Maintenance and repairs should only be carried out by authorized service personnel!
  - Attach the device so that the warning is clearly visible and readable.
  - Caution – Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Function Principle

The LS684-DA-EN is a device for serial data transfer in Ethernet systems. One F1 and one F2 device is needed for each data transfer link. Data is transferred in both directions simultaneously by means of modulated light.
