Wiring diagram

Functional principle

Simple control tasks can be solved with the inductive linear position sensors of the WI series from Turck.

They are selectively operated with a non-ferrous metal ring or blind hole and provide a distance proportional, analog output signal.

Mounting instructions

Mounting instructions/Description	
	Distance D72 mm
	Distance W2 x B
	Distance T5 x B
	Distance S1 x B
	Distance G3 x B
	Distance N85 mm
	Diameter active area BØ 18 mm
Use non-ferrous metals for ring or blind hole only.	
The diameter of the blind hole depends on its wall thickness and the material.	
Only the use of the NF-ring, which is included in the delivery, ensures that the values stated in the data sheet are observed.	
In case of non-observance or use of a blind hole, the measuring range may be reduced.
